About acne

Let's face it: acne can be brutal

There it is again, staring back at you in the mirror. You've tried product after product, but the results you want may not be what you're seeing.

Acne can majorly affect your self-esteem, and the fight against it can feel like a lonely one. But it doesn't have to be that way, and we want to help.

Say hello to TWYNEO cream

The once-daily, acne-fighting, medicated combo cream

Not an actual patient.

IMPORTANT SAFETY INFORMATION (cont'd)

Adverse Events: The most common adverse reactions (incidence $\geq 1\%$) in patients treated with TWYNEO Cream were pain (stinging, burning, or pain), dryness, exfoliation, erythema (redness), dermatitis, pruritus (itching) and irritation - all at the application site.

Please see Important Safety Information throughout and full [Prescribing Information](#).

TWYNEO[®]
(tretinoin and benzoyl peroxide) cream, 0.1%/3%

Why it works

Powered by microencapsulation technology

Tretinoin and benzoyl peroxide (BPO) are 2 trusted acne-fighting treatments. But BPO deactivates tretinoin, so typically they couldn't be combined.

**Until
TWYNEO
cream!**

TWYNEO cream uses microencapsulation technology to **separate the 2 treatments** into tiny capsules. This keeps BPO from deactivating tretinoin while in the bottle.

When applied, the technology **gradually releases** each treatment onto your skin, so they can work together to fight acne.

**EXPERIENCE 2 ACNE TREATMENTS
IN 1 CONVENIENT COMBO**

How to use

It's once-daily, and as simple as C-A-M-P

SCAN **THE BOX BELOW**
TO SEE HOW IT'S DONE

CLEANSE

Use a mild cleanser to gently rinse your face and pat dry with a soft towel.

APPLY THE MEDICATION

Lightly massage a pea-sized amount of TWYNEO cream onto **each area** of your face (forehead, chin, nose, and cheeks). Avoid your eyes, lips, and mouth and let dry. Wash your hands, as the cream may stain or bleach fabric.

MOISTURIZE

Use a moisturizer (such as Cetaphil® Moisturizing Lotion) as often as needed to minimize skin dryness and irritation.

PROTECT

Use a sunscreen with SPF 30 or higher and wear protective clothing to minimize your exposure to sunlight.

Avoid using sunlamps, tanning beds, and ultraviolet light during treatment with TWYNEO cream.

IMPORTANT SAFETY INFORMATION (cont'd)

Warnings/Precautions: Patients using TWYNEO Cream may experience hypersensitivity reactions, including anaphylaxis (acute allergic reaction), angioedema (rapid swelling), and urticaria (hives). If serious hypersensitivity reaction occurs, discontinue use of TWYNEO Cream immediately and seek medical attention. Skin irritation may be experienced, including application site dryness, pain (stinging, burning or pain), exfoliation, erythema (redness), dermatitis, pruritus (itching) and irritation. Depending upon the severity, use a moisturizer, reduce the frequency of the application, or discontinue use. Avoid application to cuts, abrasions, eczematous, or sunburned skin. TWYNEO Cream may increase photosensitivity, sensitivity to ultraviolet light. Minimize or avoid exposure to natural or artificial sunlight (tanning beds or UVA/B treatment). Use sunscreen or protective clothing when sun exposure cannot be avoided. Discontinue use of TWYNEO Cream at the first evidence of sunburn.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088
